SPECTRALLY FLAT CLASS A PYRANOMETER SERIES

INTRODUCTION

PYRAsense is our new family of pyranometers that **brings solar global radiation measurement to a higher level!**
We produce a full range of pyranometers, all based on the thermopile principle, **very precise.**
Depending on the model and according to ISO 9060:2018 and WMO (World Meteorological Organization) recommendations, our PYRAsense are all classified as Spectrally Flat Class A, Class B and Class C.
The **LPS10...** is the top level of the series. It has been designed especially for those applications where the best performance is a must such as:

- Environemntal studies
- Research
- Meteorology
- PV monitoring

FEATURES

Integrated diagnostic for digital models

Internal temperature, relative humidity, and pressure sensors. You can keep an eye on the operating condition of your pyranometer and predict any maintenance work in advance, thus always ensuring reliable measurements.
Built-in **days-of-operation counter** to optimize your maintenance schedule effortlessly, ensuring peak performance.

Effortless installation

Integrated bubble level the adjustable feet to ease horizontal positioning during installation. Moreover, the pyranometer can be equipped with an optional tilt sensor which allows continuous monitoring of the correct installation.

Shield your investment

ASA protection screen to ensure unparalleled thermal stability against UV radiation, high impact and shock resistance. Moreover, this material remains free from yellowing and retains its properties unchanged over time.

CONFIGURATION & MEASUREMENT

The sensors

Using the PC application software DATAsense, it is possible to configure the sensor (e.g., Modbus parameters, measuring range for the analog output, etc.), monitor the measurements in real time and save the values detected during the connection in a file.

Passive, analog or RS485 Modbus-RTU isolated output + optional additional analog output

Configurable 0...10 V, 0...5 V, 0...1 V, 4...20 mA or 0...20 mA.

The irradiance range

It is configurable for the analog output.

Calibration report

The pyranometers are supplied factory calibrated according to ISO 9847:2023 (Type A1) standard and with an individual Calibration Report.
